

Easom maintains the highest quality in your precision assembly specifications. Welding, riveting, staking and any other means of fastening are achievable. Precision fitting of components is second nature to a company that has specialized in tight tolerance component work for over fifty years.

- Fixture design
- Fixture build
- Component assembly
- Quality assurance

Welding is one of the foundations of the fabrication process. Simply put, Easom is well-versed in all types of welding applications. Our equipment joins and bonds fabricated metal parts and components, from automotive to aerospace — all according to specification. And most important, Easom ensures the proper training of every member of our welding team in all types of welding.
